

GOOD THINGS

EASY UPGRADE
special delivery

This mailbox-turned-bike-basket is so charming, it practically deserves its own address. A standard aluminum letter box is lightweight, fits gracefully over the rear tire, and provides a generous amount of storage for the goods you pick up on spins around town. The door's latch keeps it securely closed so your items won't slide out, even if there are a few bumps in the road. For the how-to, turn the page. *M8 bike*, \$890, and *rear bike rack*, \$45, both in Chartreuse, publicbikes.com. *Mailbox*, \$17, by Gibraltar Industries, from homedepot.com.
